Summary

Backend engineer with 3 years of experience building scalable APIs and cloud-native services in Python and Java, with hands-on AWS experience.

Skills

Languages: Python, Java, SQL

Frameworks: FastAPI, Spring Boot, Django

Tools: Docker, Git, Postman

Cloud/DevOps: AWS (EC2, S3, Lambda), Terraform, GitHub Actions

Experience

Backend Software Engineer - Nimbus Cloud Solutions (Jan 2022 - Present)

- Designed and implemented a REST API in FastAPI that reduced average response latency by 35% compared to the previous Flask-based service.
- Migrated a monolithic Java service to a set of AWS Lambda functions, cutting infrastructure costs by 20%.
- Built a CI/CD pipeline using GitHub Actions that reduced deployment time from 45 minutes to 8 minutes.

Software Engineer Intern - BrightWave Technologies (Jun 2021 - Dec 2021)

- Developed internal tooling in Python to automate daily data validation checks across 5 microservices.
- Wrote unit tests that increased backend test coverage from 40% to 75%.

Projects

Inventory Sync Service (Python, AWS SQS, PostgreSQL)

A Python service that syncs inventory data between two internal systems using AWS SQS.
